

DIEGO J. ROBLES COSTA

Tampa, FL | +1 (603) 974-3262 | djrobles444@gmail.com

diegojrobles.com | github.com/diegojrobles | linkedin.com/in/diegojrobles44

EDUCATION

University of South Florida, B.S. Computer Science

Tampa, FL | Expected May 2028

Coursework: Data Structures, Computer Organization,

Certifications: C++ Programming Fundamentals (Microsoft), Google AI Essentials (Google)

SKILLS

Languages: Python, C, C++, SQL, TypeScript, JavaScript, C#, HTML/CSS

Backend and Systems: PostgreSQL, row-level security, REST API, object-oriented design, FastAPI, Flask, async request handling, serverless functions, caching and quota control, OAuth 2.0, Docker, GitHub Actions, Node.js

AI: LLM integration (Llama 3.3 via OpenRouter), retrieval augmented generation with Chroma, prompt engineering, JSON schema enforcement and repair, model output guardrails, transformer model serving (DistilBERT)

Tools and Systems: Git, Linux and CLI, React JS/Native, Microsoft Graph API, Azure and Entra ID, Windows Server, Active Directory

EXPERIENCE

IT Intern, WS Development

Boston, MA | Jul 2026 to Present

- Administer 511 user identities across Windows Server, on-premises **Active Directory**, and **Azure/Entra ID** hybrid environments spanning 100+ retail and mixed-use properties and 400+ tenant companies.
- Remediated 193 NinjaOne-flagged vulnerabilities across corporate and property-site infrastructure in 6 weeks while running recurring access reviews.
- Resolve server, network, and authentication issues from a queue of roughly 200 weekly tickets while maintaining infrastructure documentation.

Cooperative Internship – Python & Database Development, GCA

Tampa, FL | Aug 2026 to Present

- Selected for Global Career Accelerator, competitive internship program through USF focused on **Python** and **Database** Development including a project through **Intel** involving data analysis for real-world business cases.
- Collaborated with peers and industry experts in interactive, team-based sessions to solve technical problems and deliver structured project assignments.

Backend Developer Mentorship Program, Google Developer Group

Tampa, FL | Aug 2025 to Nov 2025

- Selected as **1 of 20** students for GDG Tampa's AI/ML and cybersecurity mentorship, building AI Doctor in Python under weekly mentor code review.

PROJECTS

Offr+, Recruiting Platform for Finance Students

React, TypeScript, Supabase, PostgreSQL

- Co-founded the project and wrote the codebase: 11 pages, 13 Postgres tables, and 3 serverless edge functions. Isolated tenants with 39 **row-level security** policies so no session can reach another user's data.
- Kept OAuth refresh tokens and API secrets server side in edge functions, integrated Microsoft Graph to sync calendar events and provision Teams meetings, and held a quota-limited job API under 1,000 calls per month using a shared cache keyed by normalized query.
- Built resume upload with automatic text extraction from PDF and Word files into per-user private storage buckets.

AI Doctor, Cross-Platform Healthcare App

Python, FastAPI, React Native, Llama 3.3, Chroma, Docker

- Owned the Python backend and the **retrieval augmented generation pipeline** on a four-person GDG Tampa mentorship team, roughly 3,900 lines or 45 percent of the codebase, under weekly mentor code review.
- Exposed triage, advice, and referral endpoints over **FastAPI** with JSON-only model output, repair and retry on malformed responses, and red-flag emergency detection, grounding advice in medical context retrieved from a Chroma vector store.
- Presented the system architecture at **Google DevFest** to 200+ developers and industry mentors.

AI-Server, Model Inference REST API

Python, Flask, Docker, GitHub Actions

- Built a REST API server that serves a DistilBERT sentiment model behind API key authentication, with health, predict, and model-listing endpoints, environment-based model swapping, Docker and docker-compose packaging, and a GitHub Actions workflow.

EXTRA-CURRICULARS

Society of Hispanic Professional Engineers (SHPE)

Tampa, FL | Aug 2024 to Present

- Involved in seminars, hackathons, social events, and info-sessions working towards taking on a **Tech Lead** position.

Google Developers Group (GDG)

Tampa, FL | Aug 2025 to Present

- Presented project at **DevFest**, connect with developers, involved in info-sessions, and help organize social events.
